

legend

* = Generic Available

** = Prior Authorization Required

BOLD LISTINGS = Preferred Brand

PLEASE NOTE:

When a generic becomes available, the brand-name product will automatically move to the third tier. Drugs are subject to quantity limitations. When an equivalent product is available over-the-counter, the prescription product is no longer on the formulary.

This formulary does not provide coverage for mental health medications, including but not limited to medications used for the treatment for alcoholism, drug addiction, attention deficit disorder, attention deficit-hyperactivity disorder, depression, insomnia, and other psychiatric conditions.

Step Therapy: ensures that members use clinically appropriate drugs in a cost effective manner by requiring the member to try a generic medication prior to obtaining the brand medication in certain classes.
