## Asthma Episode Reimbursement Program

---

The Arkansas Health Care Payment Improvement Initiative (AHCPII) was developed as a joint effort between Arkansas Medicaid, QualChoice and Arkansas Blue Cross and Blue Shield, its affiliates and subsidiaries (Arkansas Blue Cross). More information may be found within this manual or at [www.paymentinitiative.org](http://www.paymentinitiative.org).

The **ASTHMA** Episode Program will incentivize better coordination of care, encourage clinical effectiveness, and reward high quality care in order to reduce complications that threaten quality and increase costs.

### Episode Definition

---

This episode focuses on acute and post-acute asthma attack care. The episode begins when the patient enters the emergency room or is admitted to an inpatient facility for a diagnosis of ASTHMA, and ends 30 days after the patient is discharged from the facility.

### Principal Accountable Provider (PAP)

---

The PAP for the ASTHMA episode is the hospital where admission occurred. The PAP for each episode is identified retrospectively through claims data. As leaders, however, PAPs will share in the savings and excess costs of episodes. A provider must have five or more eligible cases of an episode to be considered a PAP. For example, a hospital must have seen at least five eligible ASTHMA episodes. The provider billing for the service on the claim is held responsible in the episode calculations. For this reason accurate coding is essential.

### Claims Submission

---

Claims filing procedures will be the same as they are today as described in Arkansas Blue Cross' Provider Network Agreements and provider manuals.

### Supplemental Quality Measures

---

In order to participate in upside savings, hospitals must meet:

1. A Quality Metric related to the percent of episodes where patient visits an outpatient physician within 30 days after initial discharge. Visits are identified as evaluation and management procedure codes that are performed in provider's office, patient's home, or a rural health clinic, by specialists in the following list: general practice, family practice, internal medicine, pediatric medicine, geriatric medicine, primary-care nurse practitioners, primary-care physician assistant, or pulmonary medicine. Rate to satisfy this measure must be equal to or greater than 50%.
2. The number of eligible episodes flagged with Corticosteroid prescriptions filled 30 days before or after initial trigger, divided by the total number of eligible episodes for a provider. To satisfy this measure the rate must be equal to or greater than 50%.
