Tonsillectomy/Adenoidectomy Episode Reimbursement Program

The Arkansas Health Care Payment Improvement Initiative (AHCPII) was developed as a joint effort between Arkansas Medicaid, QualChoice and Arkansas Blue Cross and Blue Shield, its affiliates and subsidiaries (Arkansas Blue Cross). More information may be found within this manual or at www.paymentinitiative.org.

The **Tonsillectomy/Adenoidectomy** Episode Program will incentivize better coordination of care, encourage clinical effectiveness, and reward high quality care in order to reduce complications that threaten quality and increase costs.

Episode Definition

A core component of this program is episodes of care. An episode is the collection of care provided to treat a particular condition over a given length of time. Included in the episode are all related services 90 days prior to (after and including initial consult) and 30 days after tonsillectomy/adenoidectomy procedure, including inpatient and outpatient facility services, professional services, and related medications.

Principal Accountable Provider (PAP)

For each episode, the provider that holds the main responsibility for ensuring that care is delivered at appropriate cost and quality will be designated as the PAP based on observed patterns of care. The PAP for the episode is the physician performing the tonsillectomy/adenoidectomy procedure. The PAP for each episode is identified retrospectively through claims data. As leaders, however, PAPs will share in the savings and excess costs of episodes. A provider must have five or more eligible cases of an episode to be considered a PAP. For example, a physician must have performed at least five eligible Tonsillectomy/Adenoidectomy episodes. The provider billing for the service on the claim is held responsible in the episode calculations. For this reason accurate coding is essential.

Claims Submission

Claims filing procedures will be the same as they are today as described in Arkansas Blue Cross' Provider Network Agreements and provider manuals.

Supplemental Quality Measures

In order to participate in upside savings, providers must meet:

1. A quality metric related to the 30-day readmission rate using the same re-admission criteria as CMS.
2. Additionally, PAPs will receive reports highlighting their performance on the percent of episodes with administration of intra-operative steroids, the post-operative primary bleed rate (i.e., post-procedure admissions or unplanned return to OR due to bleeding within 24 hours of surgery), the post-operative secondary bleed rate and the rate of antibiotic prescription post-surgery, if applicable, for each patient must be entered via the AHIN portal in order for the PAP to participate in sharing any applicable savings.

Tonsillectomy/Adenoidectomy Algorithm Summary v1.6

Triggers	An episode is triggered when a patient shows a claim with a Tonsillectomy or an Adenoidectomy CPT procedure code. The patient’s claims will also be processed by the OptumInsights ETG software, where they must be assigned an Episode Treatment Group (ETG) for “Tonsillitis, adenoiditis or pharyngitis...with surgery”. For specific DRG, ICD-9-CM, and CPT/HCPCS procedure codes, please see dataset.
PAP assignment	The Principal Accountable Provider (PAP) for an episode is the physician enrolled in an Arkansas Blue Plan provider network who performs the trigger procedure.
Exclusions	<p>Episodes meeting one or more of the following criteria will be excluded:</p> <ul style="list-style-type: none"> A. The patient has claims or enrollment records that indicate coordination of benefits with another payer not associated with the Arkansas Blue Plans within the duration of the episode B. The patient does not have continuous coverage with at least one Arkansas Blue Plan throughout the entire episode C. The overall episode cost for the patient exceeds the outlier criteria. Currently, the outlier threshold is set at three standard deviations above the average episode cost for all patients otherwise included in the reporting period for all PAPs D. Provider terminated prior to report publication E. Episode overlaps with another episode F. Procedure occurred late in the performance period, episode will likely appear on next report G. No outpatient facility claim H. The patient was discharged against medical advice or due to expiration I. Patient less than 3 years old at time of trigger procedure J. Patient older than 21 years at time of trigger procedure K. Concurrent procedure of Uvulopalatopharyngoplasty (UPPP) on the same date as the trigger L. Patient BMI > 50 as indicated on provider portal M. The patient has claims indicating one of the following comorbidities within 365 days before the episode: 1) Suicide and intentional self-inflicted injury, 2) Sickle cell disease, 3) Cystic fibrosis, 4) Coagulopathies, 5) Severe asthma, 6) Down syndrome, 7) Congenital defects of the circulatory system, 8) Post obstructive pulmonary edema, 9) Muscular dystrophy, 10) Myopathies, 11) Degenerative diseases of CNS, 12) Severe mental retardation, 13) Blood disorders, 14) Congenital anomalies, 15) Malignant hypothermia, 16) ESRD (end-stage renal disease), 17) Respiratory distress, 18) Bone cancer, 19) Brain cancer, 20) Bronchial/lung cancer, 21) Colon cancer, 22) Esophageal cancer, 23) GI/peritoneum cancer, 24) Liver cancer, 25) Malignant neoplasm, 26) Neoplasm unspecified, 27) Female genital cancer, 28) Male genital cancer, 29) Ovarian cancer, 30) Pancreas cancer, 31) Rectum/anus cancer, 32) Kidney/renal cancer, 33) Stomach cancer, 34) Urinary organ cancer, 35) Gallbladder cancer, 36) Secondary malignancy, 37) Other respiratory cancer, 38) Other primary cancer, 39) Pneumonia, 40) Fetal disturbances, 41) Forceps or vacuum extractor delivery, 42) Malposition, 43) Other perinatal diagnosis, 44) Umbilical cord complications, 45) Spontaneous abortion N. Patient is an Exchange member O. Patient is an Access Only member P. Non-par self-insured groups: ABB Inc. (ABB/Baldor and Thomas & Betts), Green Bay Packaging, Hytrol Conveyor Co, Inc, Mana, Nabholz Inc, Navistar Inc, NYSC NYS Holding Company (Nucor), Replacement Parts, Riceland Foods Inc, Southern Steel & Wire (effective 1/1/16), and White River Medical Center

Tonsillectomy/Adenoidectomy Algorithm Summary v1.6

Episode time window	Episodes begin with the first service performed by the PAP within 90 days before the trigger procedure and end 30 days after the trigger procedure. Comorbidities are assessed within 365 days before and within 30 days after the trigger procedure.
Claims included	The episode will include all claims identified by the ETG for “Tonsillitis, adenoiditis or pharyngitis...with surgery”. Claims with a DRG on the CMS list of exclusions for other respiratory admissions will not be included in the episode.
Quality measures	<p><u>Quality measures “to pass” (payment related):</u></p> <p>A. Intra-operative steroid rate – PAP will enter in quality metrics on all required randomly selected prospective episodes. The PAP also has the opportunity to enter in quality metrics for optional episodes, if they so choose. Only included episodes will be considered for the rate calculation. Must meet a minimum threshold of 85% of episodes.</p> <p><u>Quality measures “to track” (not payment related):</u></p> <p>A. Post-operative primary bleed rate – Calculated based on the percentage of episodes with a diagnosis identified on the “Quality Codes” list with a service date within 1 day following the trigger procedure.</p> <p>B. Post-operative secondary bleed rate – The Calculated based on the percentage of episodes with a diagnosis identified on the “Quality Codes” list with a service date 2 and 14 days following the trigger procedure.</p> <p>C. Post-operative antibiotic prescription rate – Calculated based on the percentage of episodes with a prescription drug claim with an NDC on the “Quality Codes” list filled within 30 days after the trigger procedure.</p>
Utilization measures	There are no Utilization measures for this episode.
Adjustments	The total reimbursements attributed to the PAP will be adjusted based on the presence complications that resulted in variations in treatment using a multiplier determined by regression. Over time, risk factors may be added or subtracted based on new research and/or empirical evidence.

Provider Network Operations (PNO) provides centralized administrative services for Arkansas Blue Cross and Blue Shield, Health Advantage and US Able Corporation provider networks.

Tonsillectomy/Adenoidectomy Algorithm Summary v1.6

Trigger codes	<p>Claims with following codes are considered when triggering an episode: CPT: 42820, 42821, 42825, 42826, 42830, 42831, 42835, 42836, 42870</p>
