Choose your primary care provider

Finding the right family doctor is an important part of your health journey. A family doctor (also called a primary care provider, or PCP) knows you and your medical history. And, because you know your PCP, you'll be more likely to schedule regular appointments and ask questions about your health. Your PCP should be who you see when you're not feeling well, but also who you see for regular visits like your annual wellness exam.

Why do you need a family doctor?

A primary care provider will:

- Learn your health and lifestyle history
- Help you get medical screenings to detect illnesses early
- Prescribe medications
- Refer you to specialists when needed

You can choose a PCP through your Blueprint Portal account, blueprintportal.com.

Blue Wellness Rewards

ARHOME members can earn rewards for completing eligible activities. The Blue Wellness Rewards program offers rewards based on your individual health recommendations. Up to 10 different health activities may be available with rewards ranging from **\$15** to **\$200** for completion.

How does it work?

Once you become an Arkansas Blue Cross ARHOME member, you need to register for Blue Wellness Rewards. Signing up is easy:

- Visit BlueWellnessRewards.Healthmine.com and click Register Now.
- You'll need your member ID card, date of birth, and email address to set up your account.
- You can also call 800-800-4298 to sign up with a customer service representative.
- Once registered, you'll receive an email letting you know that your account is set up.

Rewards can be redeemed for gift cards from national and local retailers, including a wide assortment of grocery stores, restaurants and other popular stores!

When to make an appointment

When you're healthy

Seeing doctors when you're healthy allows them to get to know you and watch for any health issues before they have a chance to become more serious. Once you've found a PCP, you can schedule your FREE annual wellness exam right away.

When you're sick

If you're sick and need medical care, call your PCP right away to schedule an appointment. Catching any problems early on can help you make a full recovery faster. Your doctor knows your health history and how best to treat you; plus, it's less expensive than going to the emergency room.

When to visit the emergency room

- Suspected heart attack
- Stroke
- Poisoning
- Serious burns
- Severe shortness of breath
- Choking
- Broken bones
- Anything that could cause long-term damage

Important: Covered services for life-threatening emergencies will be paid whether it's in network or not, but routine or non-emergency services provided in the ER will not be covered.
